

Technology Industrial Placement Program 2026 - Assessment

Instructions

You have 48 hours to complete the assessment. Please ensure your final deliverable is submitted as a Dockerfile or Docker Compose file.

Assessment: Build a basic "Portfolio Management Dashboard" application.

Requirements:

1. User Authentication:
 - Implement a basic authentication system (e.g., login/logout) using JWT (JSON Web Tokens).
2. Portfolio Overview:
 - Create a dashboard where users can view their investment portfolios.
 - Display a summary of assets, such as stocks, bonds, and mutual funds, including their current value, purchase price, and performance metrics.
3. Transaction History:
 - Implement a feature where users can view a history of their transactions (buy/sell)
4. Add/Edit Investments:
 - Allow users to add new investments and edit existing ones.
5. Technology Stack:
 - Front-end: Use any technology of your choice.
 - Back-end: Use any technology of your choice.
 - Database: Use any type of database (e.g., Redis, NoSQL, relational databases).
 - Version Control: Use Git for source control and demonstrate commit history
6. Deliverable:
 - The deliverable should be Dockerfile (or compose) which could run the application.

Please note that the business case materials are confidential and intended for personal use in the interview process only. **Do not share or distribute them to anyone else.**
